Business ID: BIZ-APAC-IN-44291

Issue Date: 21 April 2026

Validity Period: 1.5 Months from
Issue Date

Document Version: v2.1

Prepared For: Tranquil Decor

Region: India Business Operations

Division: APAC Digital Services

i This document is an officially issued service integration notice from Meta Platforms, Inc., Business Services Division. It confirms the active integration status of Meta services for the named business entity and is system-generated for informational and service acknowledgement purposes. Document Reference: META-BIZ-INT-0426-IND.

Introduction & Client Acknowledgement

This Official Service Integration & Partner Support Notice is issued by Meta Platforms, Inc., Business Services Division, Global Business Operations, to formally acknowledge and document the active utilisation of Meta's suite of business and digital engagement services by **Tranquil Decor**, operating within the India Business Operations region under the APAC Digital Services Division.

Following a comprehensive review of the account activity and service integration records associated with Client ID **TRD-META-2026-00847**, it has been confirmed that Tranquil Decor is actively leveraging Meta's platforms and tools for the purposes of business growth, digital engagement, customer acquisition, and conversion optimisation. This notice serves as an official record of the same, in accordance with Meta Business Policies and platform service standards.

Tranquil Decor has demonstrated consistent and compliant utilisation of Meta's business infrastructure, including advertising management, customer communication channels, website integration technologies, and analytics tracking systems. The integration status documented herein reflects the state of services as assessed on the issue date referenced above and is subject to periodic review and optimisation in alignment with evolving platform capabilities and business requirements.

This document is intended for the attention of authorised personnel at Tranquil Decor, as well as internal Meta support teams and designated corporate partners involved in the ongoing management and optimisation of the aforementioned services. Any queries pertaining to the contents of this notice should be directed to the Meta Business Support Portal as detailed in Section 8.0 of this document.

Client Entity Tranquil Decor	Account Status Active & Verified
Integration Level Fully Integrated	Review Cycle Periodic — Annual

Services Covered Under This Notice

The following section provides a comprehensive overview of all Meta services currently active and integrated under the Tranquil Decor business account, spanning both Meta platforms and Google's digital ecosystem. Each service listed has been verified as operational and compliant with applicable Meta Business Policies as of the issue date of this notice. The integration levels indicated reflect the depth of configuration and activation status confirmed through internal service auditing processes conducted by Meta's Business Services Division.

All services listed above have been confirmed as active and in good standing as of the issue date. Any changes to the integration status of individual services will be communicated via the Meta Business Support Portal and reflected in subsequent document revisions. This notice supersedes any prior service acknowledgement documentation issued under Reference ID META-SERVICES-2026-04 or earlier.

Google Search & SEO	Active	Optimised	Search & Rankings
Google Knowledge Panel	Active	Configured	Google Presence
Google Ads Integration	Active	Connected	Advertising & Campaigns

Business Presence — Facebook & Instagram

Facebook Business Page

Tranquil Decor's Facebook Business Page has been verified as fully integrated within the Meta Business Suite ecosystem. The page is configured for business communications, product catalogues, customer engagement, and organic content distribution in compliance with Meta Community Standards and Business Policies.

Facebook Page Insights

Full access to audience demographics, reach metrics, engagement data, and post-performance analytics via Meta Business Suite.

Cross-Platform Linking

Unified account management through Meta Business Manager, enabling seamless administration of both platforms from a single dashboard.

Instagram Business Profile

The Instagram Business Profile associated with Tranquil Decor has been confirmed as active and linked to the primary Meta Business Manager account. The profile is enabled for shopping features, professional analytics access, and cross-platform advertising integration through Meta's unified Ads Manager infrastructure.

Both platforms are configured for cross-posting functionality, enabling Tranquil Decor to manage content, communications, and advertising campaigns through a single, unified interface in accordance with Meta's Business Suite operational framework.

Instagram Professional Tools

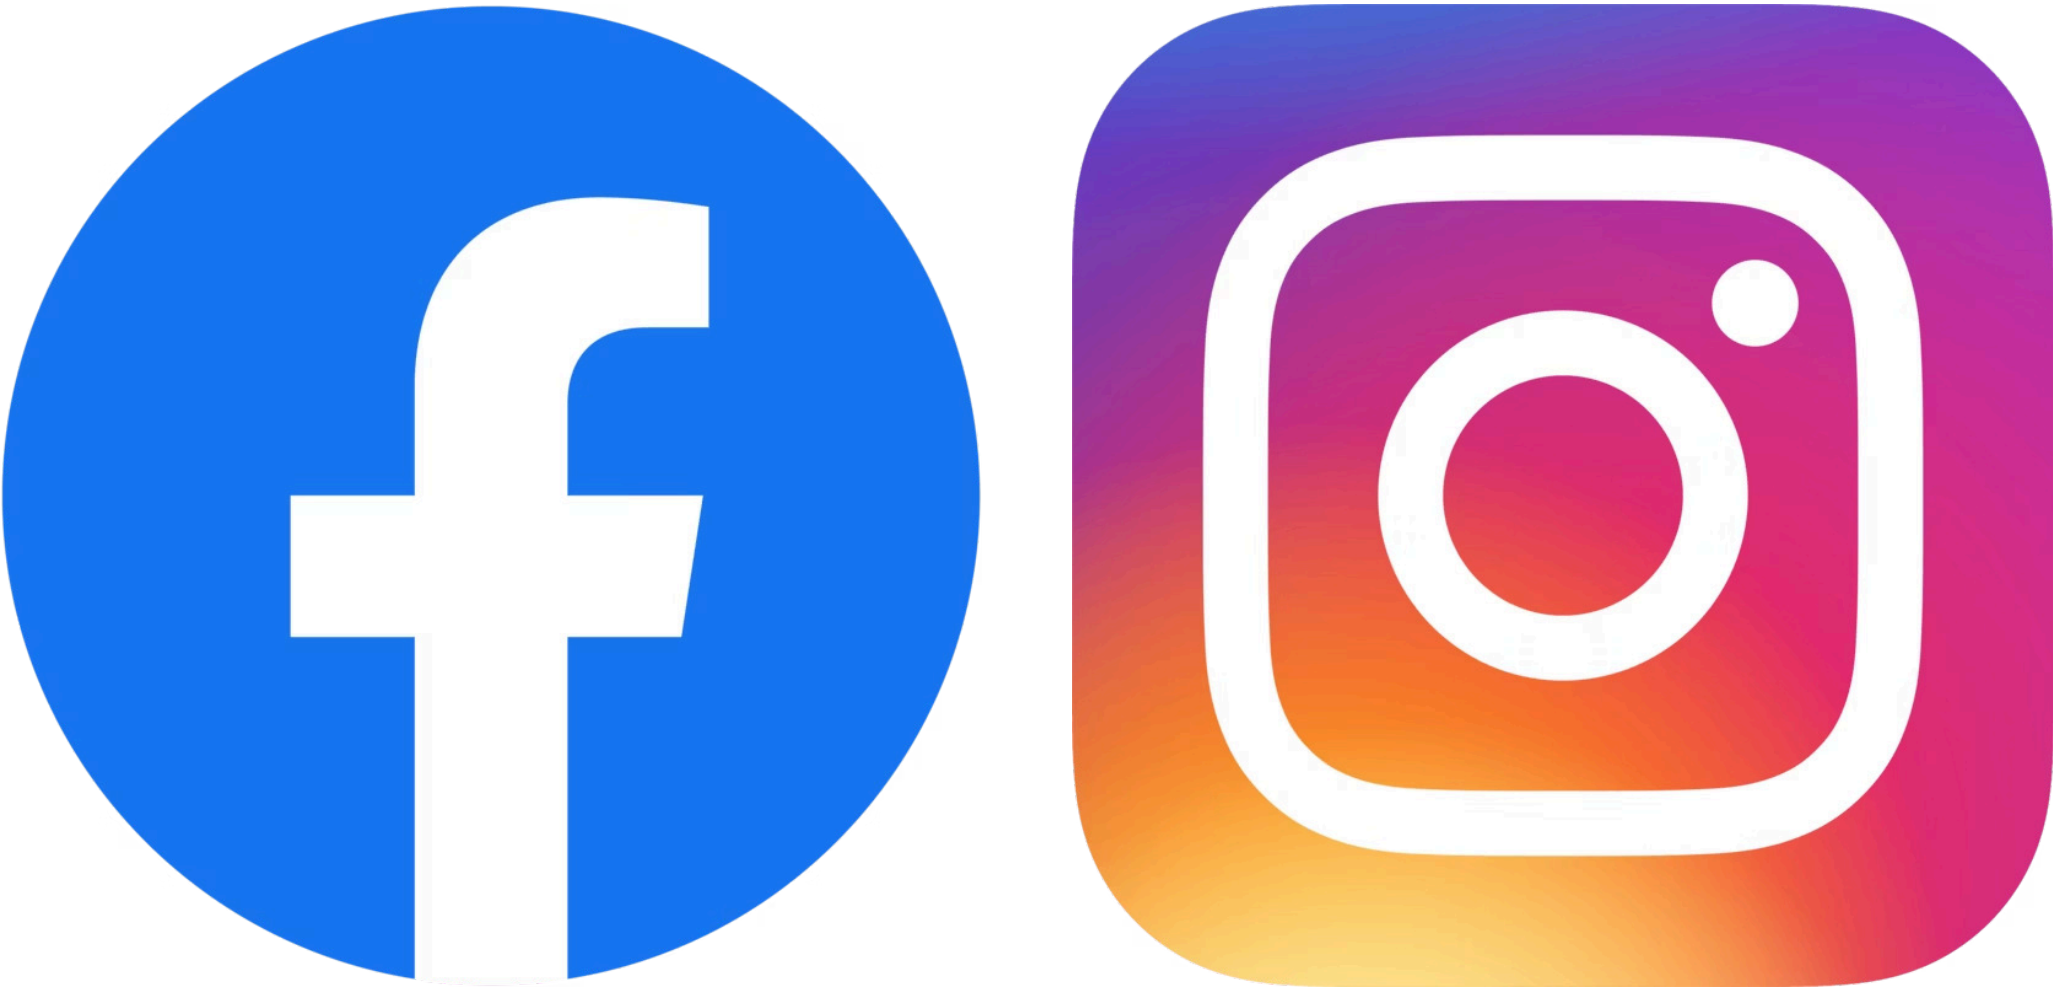

Access to Instagram Insights, promoted post capabilities, and product tagging features integrated with the Meta Ads infrastructure.

Policy Compliance

Both accounts have been reviewed and confirmed compliant with Meta's Business Integrity and Community Standards policies as of the issue date.

Meta Ads — Lead Generation & Campaign Management

Tranquil Decor has been confirmed as an active advertiser operating within Meta's Ads Manager platform, with campaigns configured across both lead generation and brand awareness objectives. The advertising account associated with Client ID **TRD-META-2026-00847** has been reviewed and determined to be in full compliance with Meta's Advertising Policies, Community Standards, and Data Use Policy as applicable to business advertisers operating within the India Business Operations region.

Lead generation campaigns have been configured utilising Meta's native Lead Forms, enabling Tranquil Decor to capture prospective customer information directly within the Facebook and Instagram ecosystems. These forms are integrated with downstream communication and CRM workflows, facilitating timely follow-up and customer engagement in accordance with applicable data handling standards.

Campaign Objectives — Confirmed Active

- Lead Generation via Meta Instant Forms
- Reach & Awareness Campaigns
- Engagement Optimisation Campaigns
- Traffic Campaigns to Integrated Website
- Click-to-WhatsApp Campaign Activation
- Retargeting via Custom Audiences

Ads Account Compliance Details

- Account Standing: **Good Standing**
- Payment Method: Verified & Active
- Billing Currency: INR (India Region)
- Policy Review Status: Compliant
- Audience Network: Enabled
- Campaign Budget Optimisation: Configured

Meta Ads campaign management for Tranquil Decor is currently configured to leverage Meta's advanced machine learning optimisation algorithms, including Advantage+ audience targeting, automatic placements, and bid strategy optimisation. These configurations are designed to maximise return on advertising expenditure in alignment with the business objectives documented within the Ads Manager account. All campaign data is subject to Meta's standard data retention and reporting policies.

WhatsApp Business Integration & Communication Tools

WhatsApp Business Integration

Tranquil Decor's WhatsApp Business account has been confirmed as connected and operational within the Meta Business ecosystem. The integration facilitates direct business-to-customer communication, enabling Tranquil Decor to manage customer enquiries, share product catalogues, dispatch order notifications, and conduct lead nurturing activities through the WhatsApp Business platform.

The WhatsApp Business integration is further configured to support Click-to-WhatsApp advertising functionality, wherein Meta Ads campaigns directly route prospective customers to a WhatsApp conversation thread, significantly reducing friction in the customer acquisition and enquiry process. This configuration has been verified as active and operationally optimised under the current account setup.

Click-to-WhatsApp Ads

Active — campaigns configured to direct ad traffic directly into WhatsApp Business conversations, confirmed enabled and operationally live.

Automated Messaging

Automated greeting messages, away messages, and quick reply shortcuts confirmed as active within the WhatsApp Business account settings.

Messenger Business Tools

Meta Messenger has been confirmed as an active communication channel for Tranquil Decor's Facebook Business Page. Automated response configurations, including instant replies and frequently asked question (FAQ) automation, have been noted as configured within the Page inbox settings, ensuring consistent and timely engagement with prospective and existing customers.

The Messenger platform is integrated with Meta Business Suite's unified inbox, enabling centralised management of communications received via both Facebook Messenger and Instagram Direct. This unified communication infrastructure supports efficient customer service operations in accordance with Meta's Business Messaging guidelines.

WhatsApp Business Catalogue

Product and service catalogue within WhatsApp Business confirmed as configured, enabling customers to browse offerings directly within the messaging interface.

Unified Inbox Management

Meta Business Suite unified inbox confirmed active, consolidating Messenger and Instagram Direct communications into a single managed interface.

Google Presence, SEO & Search Rankings

This section documents the confirmed impact of Tranquil Decor's digital service integrations on its Google presence, search engine optimisation (SEO) performance, and organic search rankings. Non-compliance or disruption to the active service configurations documented in this notice may directly affect Tranquil Decor's visibility across Google Search, Google Maps, and Google's Knowledge Panel infrastructure. Tranquil Decor is advised to maintain all active integrations to safeguard its established online presence and search ranking position.

Impact on Google Search Rankings

Disruption to active Meta service integrations and digital presence configurations may negatively affect Tranquil Decor's organic search ranking signals. Google's ranking algorithms factor in website engagement metrics, bounce rates, and traffic quality — all of which are directly influenced by the active Meta Pixel, Conversion API, and campaign configurations documented herein. Any degradation in these integrations may result in measurable ranking deterioration across targeted search terms.

Google Business Profile & Knowledge Panel

Tranquil Decor's Google Business Profile and associated Knowledge Panel entries are linked to the business's broader digital footprint, including its Facebook Business Page, Instagram Business Profile, and website integration data. Inconsistencies or disruptions in the active Meta service configurations may affect the accuracy and completeness of information displayed in Google's Knowledge Panel, impacting customer trust and local search visibility.

SEO Signal Degradation

Reduced website traffic from Meta campaigns directly impacts Google's quality signals, potentially lowering organic search rankings for key business terms and local search results.

Google Maps Visibility

Business activity signals from integrated platforms contribute to Google Maps ranking factors. Disruption to active integrations may reduce Tranquil Decor's visibility in local map search results.

Knowledge Panel Accuracy

Google's Knowledge Panel aggregates data from multiple digital sources including social profiles and website data. Service disruptions may cause outdated or incomplete information to appear in branded search results.

Online Reputation Impact

Customer reviews, engagement metrics, and business activity signals across Meta platforms contribute to overall online reputation scores that influence Google's assessment of business authority and trustworthiness.

 Maintaining all active service integrations documented in this notice is critical to preserving Tranquil Decor's established Google search rankings, local SEO performance, and Knowledge Panel accuracy. Any lapse in service continuity may result in measurable and potentially long-term impacts on online visibility and customer acquisition through organic search channels.

Website Integration & Technical Configuration Details

This section documents the technical integration details confirmed between Tranquil Decor's business website and Meta's suite of digital tracking and conversion optimisation technologies. The configurations detailed herein have been verified through Meta's internal service audit processes and reflect the technical state of the integration as of the issue date of this notice. All website integration activities are subject to the provisions of Meta's Business Tools Terms and applicable data protection standards.

Meta Pixel
Status: **Active**
Pixel tracking code confirmed as installed and firing correctly on all primary website pages.

Conversion Tracking
Status: **Configured**
Standard and custom conversion events configured and verified through Meta Events Manager.

Lead Capture Forms
Status: **Integrated**
Website lead capture forms confirmed as integrated with Meta's lead management and ads reporting infrastructure.

Conversion API
Status: **Active**
Server-side Conversions API configured to supplement browser-based Pixel tracking for enhanced data reliability.

Pixel Event Tracking — Confirmed Events

- PageView — All website pages
- ViewContent — Product/Service pages
- Lead — Form submission events
- Contact — Enquiry initiation events
- InitiateCheckout — Purchase intent events
- Purchase — Transaction completion events

Advanced Matching Configuration

- Automatic Advanced Matching: Enabled
- First-Party Data Collection: Configured
- Custom Audience Pixel Seeding: Active
- Lookalike Audience Data Collection: Enabled
- Cross-Device Attribution: Configured
- Data Freshness Status: Current

The deployment of the Meta Pixel in conjunction with the Conversions API (CAPI) represents an advanced, dual-signal tracking architecture that provides superior data accuracy in the context of browser-level tracking restrictions introduced by operating system and browser updates. This configuration ensures that Tranquil Decor's advertising optimisation data remains reliable and actionable, in accordance with Meta's recommended best practices for website integration and measurement.

Service Benefits & Business Impact Assessment

The active utilisation of Meta's integrated suite of business services delivers measurable and substantiated benefits to Tranquil Decor's digital business operations. The following assessment documents the primary areas of business impact attributable to the confirmed service integrations, as evaluated by Meta's Business Services Division in accordance with standard partner performance review protocols applicable to active business accounts within the APAC Digital Services Division.

Enhanced Customer Reach

Meta's platforms provide access to one of the world's largest active user bases across Facebook, Instagram, and WhatsApp. Through precise audience targeting capabilities within Meta Ads, Tranquil Decor is positioned to reach highly relevant prospective customers based on demographics, interests, behaviours, and geographic parameters, significantly extending the effective market reach of the business beyond organic channels.

Improved Lead Generation

The combination of Meta Ads Lead Generation campaigns, Click-to-WhatsApp advertising, and website-integrated lead capture forms creates a comprehensive, multi-channel lead acquisition framework. This integrated approach reduces cost-per-lead through optimised campaign delivery and enables Tranquil Decor to capture qualified business enquiries at scale across multiple customer touchpoints within the Meta ecosystem.

Seamless Customer Communication

The integration of WhatsApp Business, Facebook Messenger, and Instagram Direct into a unified communication infrastructure facilitates seamless, real-time engagement with customers at every stage of the purchasing journey. Automated messaging configurations ensure consistent responsiveness, whilst the unified inbox enables efficient management of multi-channel communications from a single operational interface.

Data-Driven Marketing Optimisation

Meta Pixel tracking, the Conversions API, and the Meta Analytics Dashboard collectively provide Tranquil Decor with comprehensive, actionable data pertaining to website visitor behaviour, campaign performance, audience insights, and conversion metrics. This data infrastructure enables evidence-based decision-making in marketing strategy and budget allocation, supporting continuous performance improvement and return on investment optimisation.

Compliance Statement & Policy Alignment

Meta Platforms, Inc. hereby confirms that the utilisation of Meta services by Tranquil Decor, as documented within this notice, has been reviewed and determined to be in alignment with standard digital business practices and applicable Meta platform policies. This compliance assessment has been conducted in accordance with Meta's Business Integrity review protocols and reflects the account status as of the issue date referenced herein.

Policy Framework Compliance

The services utilised by Tranquil Decor operate under and in conformance with the following Meta policy frameworks, each of which governs specific aspects of platform usage, data handling, and advertising conduct.

- Meta Business Tools Terms
- Meta Advertising Policies
- Meta Community Standards
- WhatsApp Business Policy
- Meta Privacy Policy & Data Use Policy

Compliance Declarations

In accordance with Meta Business Policies, the following compliance declarations are formally recorded under this notice:

- All advertising campaigns comply with Meta's Advertising Standards and Community Policies.
- Data handling associated with Meta Pixel and Conversions API deployment complies with applicable platform standards and Meta's Business Tools Terms.
- WhatsApp Business usage conforms to Meta's messaging policies and prohibits unsolicited bulk messaging.
- Lead data collected via Meta Instant Forms is handled in accordance with disclosed privacy practices.
- Account activity is subject to periodic review and optimisation by Meta's Business Integrity teams.

 In accordance with Meta Business Policies, this notice and the service status records contained herein are subject to periodic review and optimisation. Data handling activities associated with all referenced Meta services comply with applicable platform standards and Meta's published data use policies. The compliance status documented herein reflects the assessed state of the account as of the issue date and may be updated in subsequent document revisions.

Tranquil Decor is advised to maintain ongoing compliance with Meta's policies through regular review of the Meta Business Help Centre resources and any policy update communications issued by Meta's Business Services Division. Material changes to Meta's policies that may affect the services referenced herein will be communicated through Meta's standard business communication channels in advance of their effective dates.

Advisory Notice — Continuous Optimisation Recommendations

Meta Platforms, Inc., Business Services Division, hereby issues the following advisory recommendations to Tranquil Decor in relation to the continuous optimisation of Meta service utilisation. These recommendations are provided in the interest of maximising the business growth outcomes and customer engagement effectiveness achievable through the confirmed service integrations documented in this notice. Adoption of these recommendations is strongly advised, though not mandated, and remains at the discretion of Tranquil Decor's authorised management personnel.

1

Pixel Health Monitoring

Regular monitoring of Meta Pixel health and event quality scores via Meta Events Manager is recommended to ensure continued accuracy of conversion tracking and audience data. Meta recommends monthly reviews at a minimum.

2

Campaign Performance Reviews

Systematic review of Meta Ads campaign performance metrics on a bi-weekly basis is advised, with particular attention to cost-per-result trends, audience saturation indicators, and creative fatigue signals.

3

Advantage+ Feature Adoption

Adoption of Meta's Advantage+ campaign features, including Advantage+ Audience and Advantage+ Creative, is recommended to leverage Meta's machine learning optimisation capabilities for improved campaign efficiency.

4

WhatsApp Catalogue Updates

Regular updates to the WhatsApp Business product and service catalogue are recommended to ensure prospective customers are presented with current and accurate business offerings, supporting improved conversion rates.

- ✔ Continuous and optimised usage of Meta services is strongly recommended for sustained business growth and customer engagement improvement. Businesses that actively optimise their Meta service integrations consistently demonstrate improved customer acquisition efficiency and higher returns on digital marketing investment.

Document Verification & Authentication

This section provides document authentication details for verification purposes.
